

Application Vendors and their license usage policies

August 2003

Prepared by Integrity Software, Inc.

Each computer program (“Application”) your organization acquires through direct purchase, corporate merger, buyout, joint venture or otherwise has its usage controlled by an End User License Agreement (EULA). The data provided in the following table is the result of our research efforts including direct conversations with the vendors and information found directly on their websites. The website links found are provided in the table. Also in the table that follows you will find some vendors incorporate the use of an internal license control software function to control their Application’s usage. Some of these internal license control functions provide usage reports, some more elaborate than others, some provide no reporting at all.

When you use SofTrack you receive uniform reporting and auditing of actual Application use regardless of any internal license control software each different vendor may or may not utilize. The Application and software usage reports you receive from SofTrack provide you with the insight you need to make wise purchasing decisions. SofTrack *saves you money* by revealing your actual Application license use while defending you from software piracy (under purchasing of licenses) and free of wasteful spending (over buying of licenses).

The following table represents the initial or default Application license usage policies for each vendor and application listed. Please note that your organization may have negotiated a separate license usage policy.

Disclaimer: This document is intended for general reference purposes and is not legal advice. Please consult the appropriate legal professional for specific advice.

| Vendor | Application | Commercial Use Policy | Allows Concurrent Commercial Use ? | Education Use Policy | Allows Concurrent Educational Use ? |
|-----------------------|-------------------------------------|---|------------------------------------|---|--|
| Adobe | *All except stand-alone use license | Must purchase license for each desktop where used | No | Allows Concurrent Metering as long as 3 rd party product such as SofTrack is used to regulate concurrent use | Yes , please see link below for details |

http://www.adobe.com/education/pdf/concurrency_FAQ.pdf

| | | | | | |
|------------------------------------|--------------------------------------|---|---|---|--------------------|
| Abvent Software | Artlantis | As of Summer 2003, new Enterprise-wide license allows unlimited usage with no restrictions | Yes, but not required since enterprise license allows unlimited use | Same as Commercial | Same as Commercial |
| Altium | ProteIDXP | Uses internal license control software | Yes, but only when using their internal licensing control software | Same as Commercial | Same as Commercial |
| Autodesk | *All except stand-alone use licenses | Uses internal license control software (beginning July 2002) | Yes, but only when using their internal licensing control software | Same as Commercial | Same as Commercial |
| CADKEY | CADKEY | Uses internal license control software | Yes, but only when using their internal licensing control software | Same as Commercial | Same as Commercial |
| Capilano Computing | Designworks | Allows Concurrent Metering as long as 3 rd party product such as SofTrack is used to regulate concurrent use | Yes | Same Note: Prentice-Hall publishes the software for educational use | Yes |

| Vendor | Application | Commercial Use Policy | Allows Concurrent Commercial Use ? | Education Use Policy | Allows Concurrent Educational Use ? |
|-----------------------|---|---|------------------------------------|----------------------|-------------------------------------|
| Corel | Flowcharter 7.0 and all Micrografx products (purchased by Corel) Also all other Corel products | Allows Concurrent Metering as long as 3 rd party product such as SofTrack is used to regulate concurrent use | Yes | Same as Commercial | Yes |
